Reform is part of a seismic change

Disruption

Healthcare cost is a global strategic crisis

Value Migration

- Revenue model (FFS) threatened
- Reimbursement model (Payers) threatened
- ACOs ... risk management
- Cost containment
- Active care intervention
- Alternative revenue growth
- Patient engagement
- New “low end” care delivery models

Market response

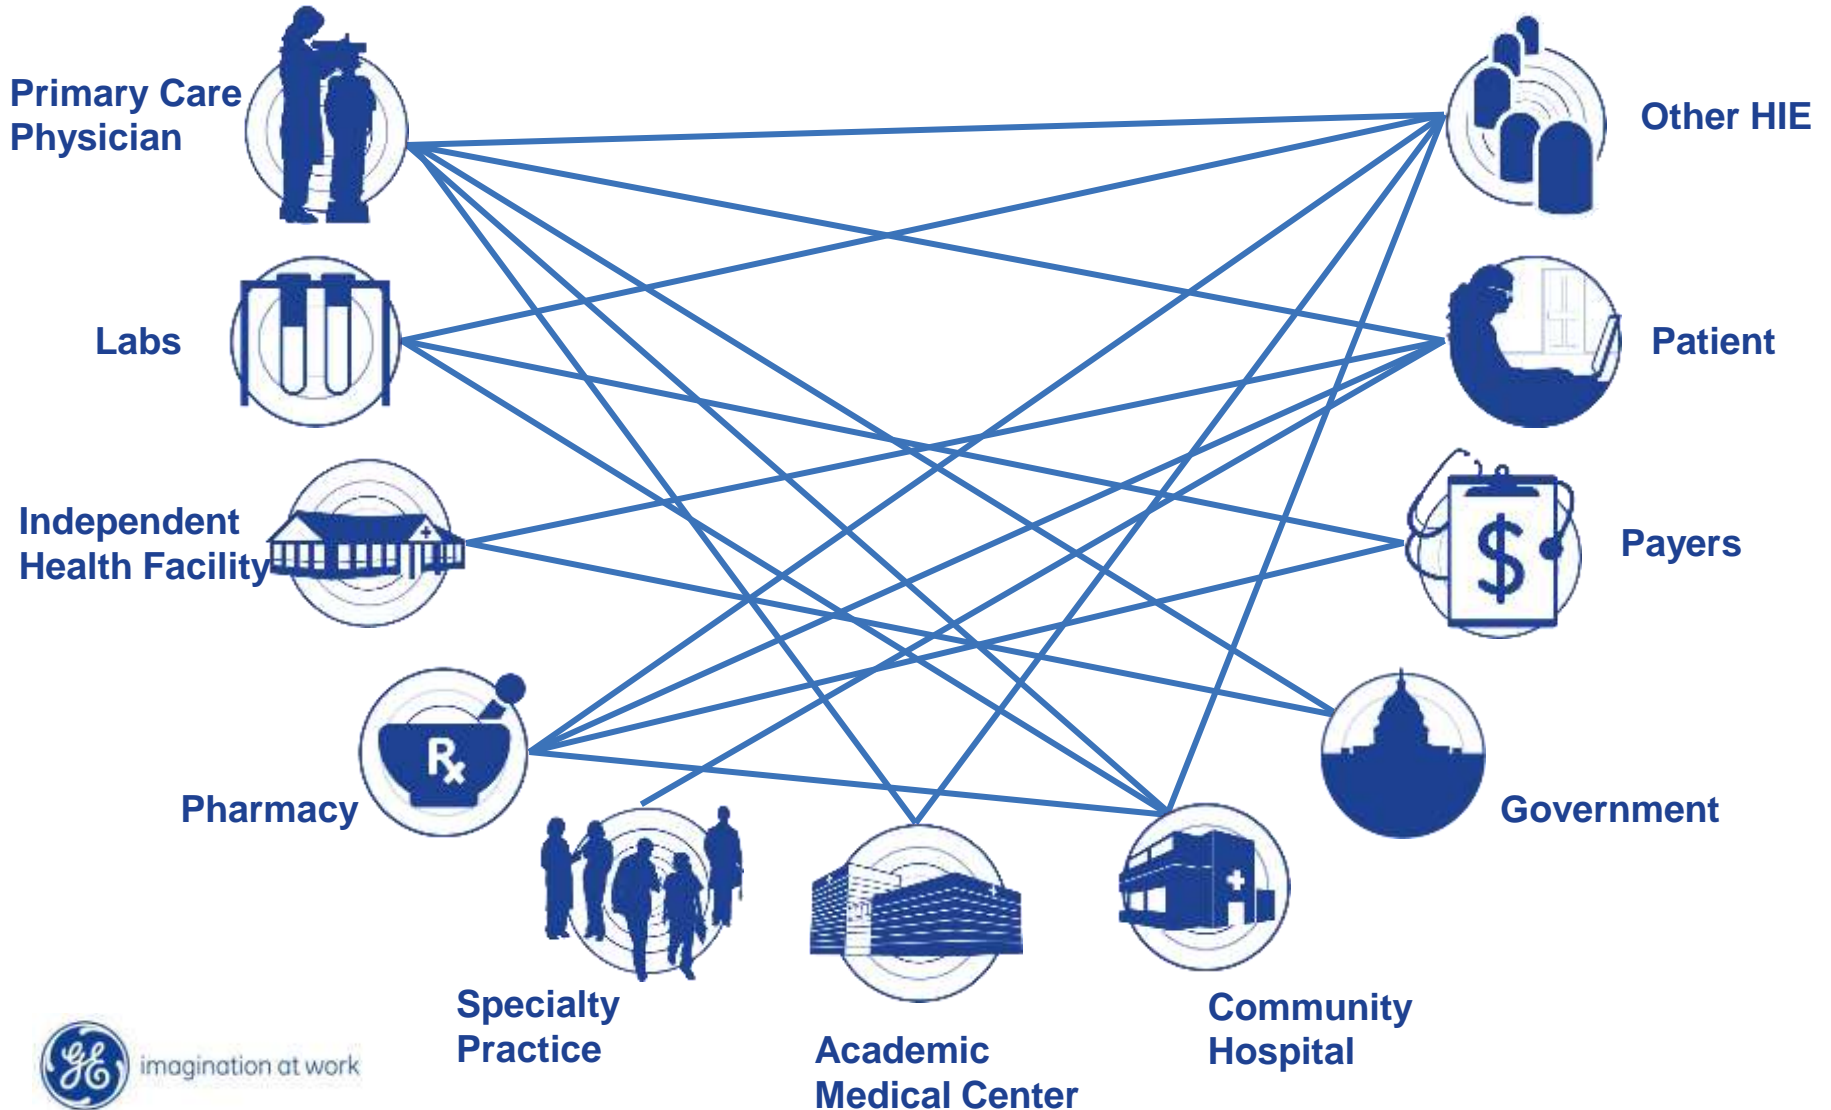

- Market consolidation
- Vendor consolidation
- Maturing product markets
- Improving capability of low-cost competitors
- New entrants
- New delivery models
 - SaaS, PaaS, HISP
 - Solutions v. Products

Today's Challenge - heterogeneous, disconnected silos

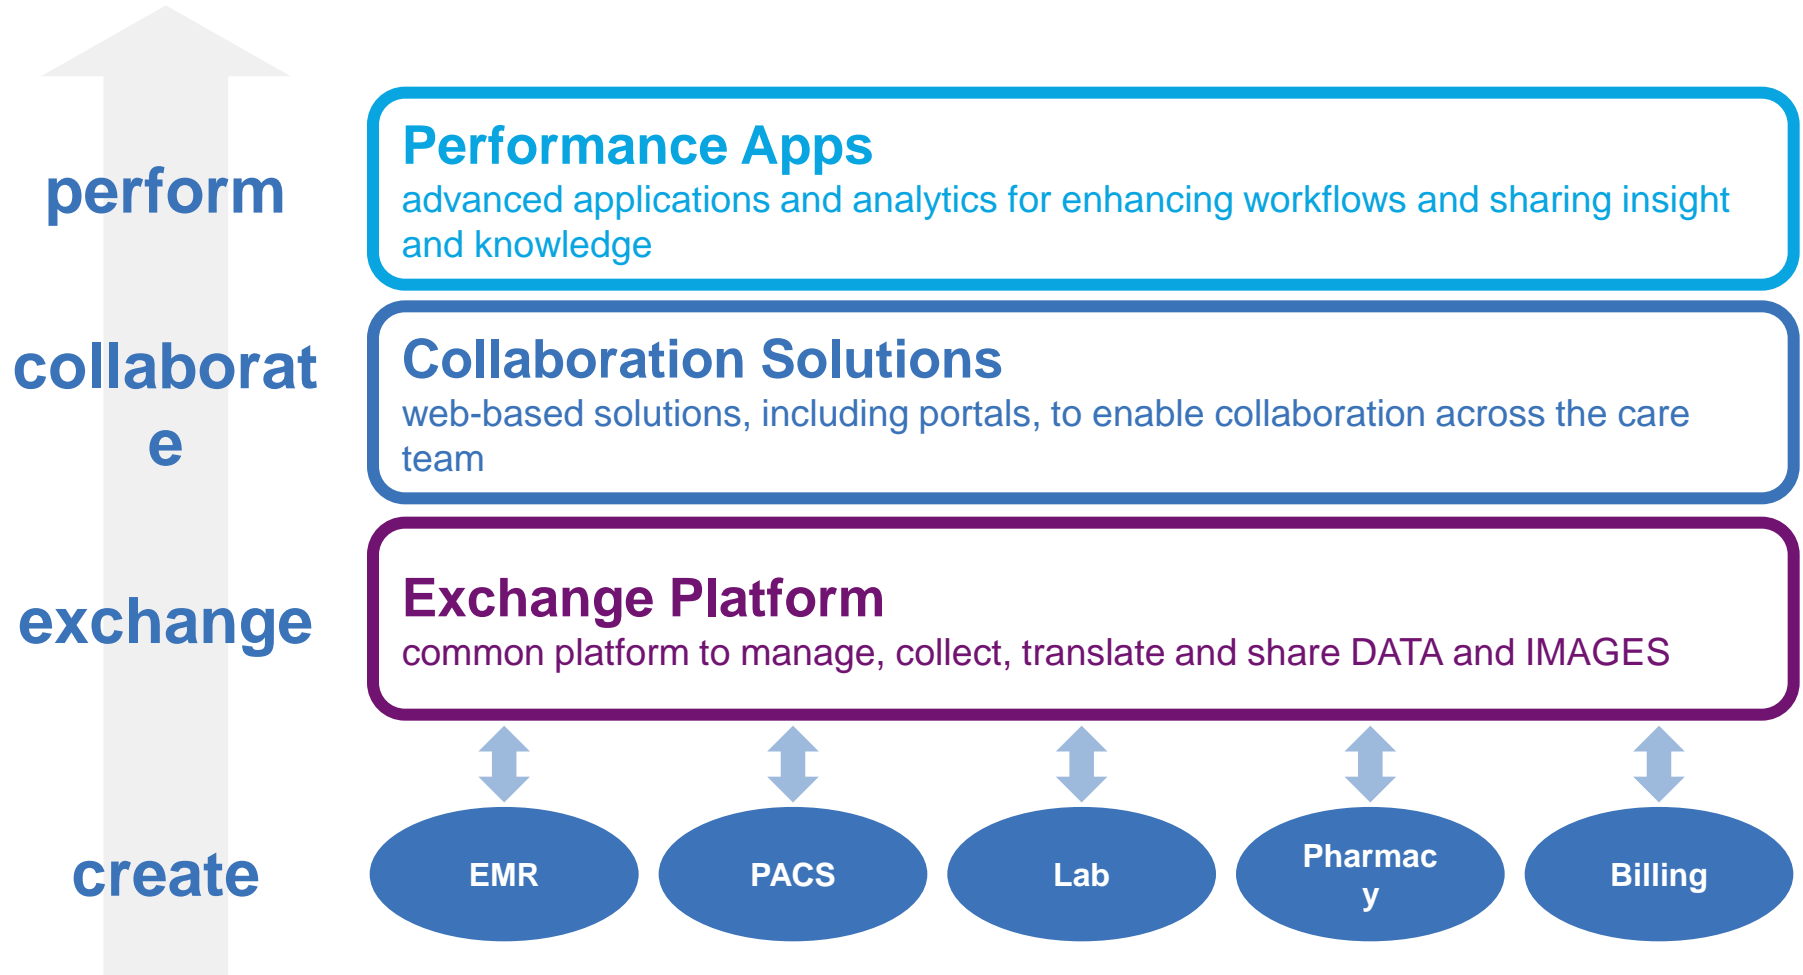

Caught in a web of point to point

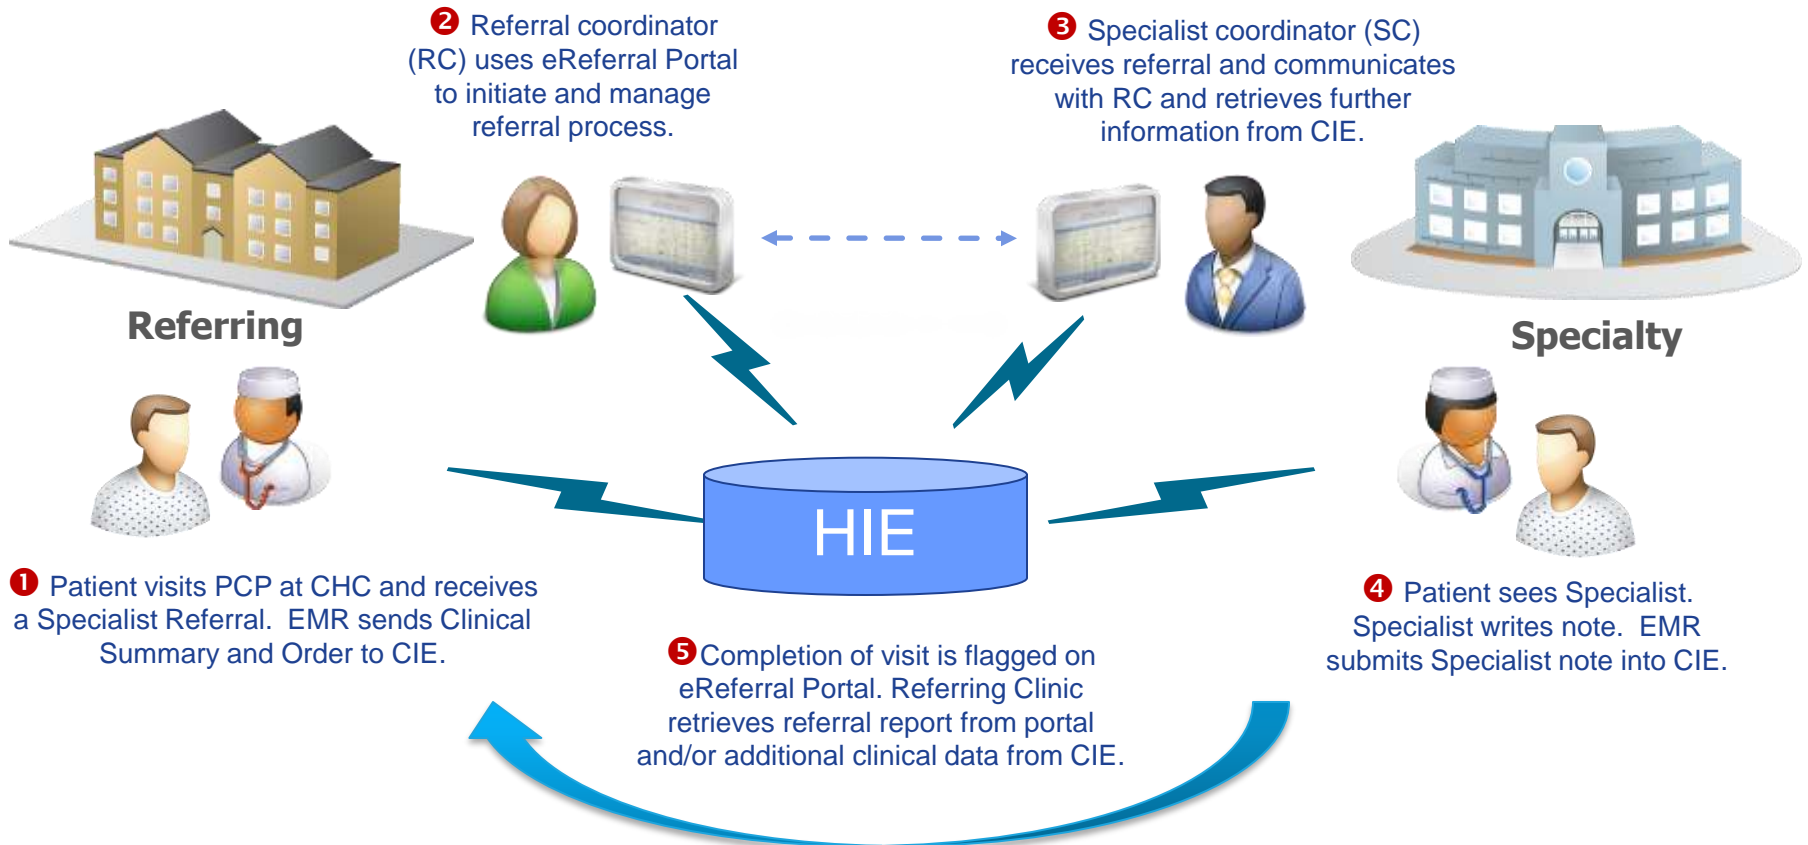

Today's Answer - connected healthcare communities

Transform Care with eHealth Solutions

Image and Information Exchange

standards-based solution connects heterogeneous systems

eHealth Community Desktop

A web-based clinical portal that enables collaborative care across a community of clinicians

- ✓ Widen community access with an easy, browser-based user interface
- ✓ Enable care teams, including case managers, to facilitate care coordination
- ✓ Bring various in-house applications together in one place
- ✓ Extend your HIE investment over time with add-on workflow and performance apps
- ✓ Increase HIE use with flexible screen layouts to match your look-and-feel

The screenshot displays the eHealth Community Desktop interface for a patient named Watts, Leila Mrs. The interface is organized into several sections:

- Header:** Includes the user's name, a search bar, and navigation tabs for Home, Messages, and Patients.
- Patient Summary:** Shows the patient's name, age (33 year old female), contact information, insurance details, and lifestyle notes.
- Filtering:** A section for filtering data by date range (06/03/2010 to 06/03/2010) and location.
- Problems:** A table listing medical conditions such as Non-insulin dependent Diabetes, Essential Hypertension, and Anxiety depression.
- Medications:** A table listing drugs like Metformin, Glyburide, and Lisinopril with their respective dosages and frequencies.
- Allergies:** A table listing allergies such as Penicillin, Sulfa, and IV Contrast Dye.
- Medical History:** A table listing past medical events like Wound debridement of left great toe, MI/CHF, and Hypertension.
- Vital Signs/Measurements:** A table showing historical vital signs including temperature, pulse, respiration, blood pressure, weight, height, and BMI over time.

Thank You
